

Welcome to my faster slide ever!

Interested?

Super! 😎

This is awesome!

I just have to write in a markdown file (text file).

And here is the main text of my presentation.

Also you can add images and icons.

This	is	AMAZING!

Dude, what about code...

Python

```
print("Hello World, from Python")
```

HTML

```
<!DOCTYPE html>  
<html>  
  <body>  
    <h1>Hello World</h1>  
  </body>  
</html>
```

Another slide

and another...

and another...
